

School of Business at Southern University of Science and Technology (SUSTech) welcomes applicants for operations management/operations research faculty positions at all ranks commencing in 2024. Applicants should have a PhD in a related area such as operations management, operations research, management science, business analytics, industrial engineering, system engineering, computer science and so on. Fresh PhD graduates need to have a potential of conducting high quality research. Senior faculty applicants need to have proven records of publishing in top-tier journals and strong teaching capability. Regular teaching loads are two courses per year. New faculty may have course reductions.

Salary is highly competitive with additional subsidy from Shenzhen government. We also provide adequate start-up research fund and fringe benefits including retirement and medical care insurances, housing allowance, and kindergarten & elementary school enrollment support among others.

### **About SUSTech**

Southern University of Science and Technology (SUSTech) is a public university founded by the government of Shenzhen which is regarded as the most dynamic city and one of economic centers in China. SUSTech have attracted over 1300 faculty members in the past ten years.
